

PERACTIVE® TAED

The clean and clever way of bleaching

- A System with many functions ✓*
- Efficient and economical ✓*
- Bleaching system worldwide ✓*
- Better pre-soak formulations by using Peractive® ✓*
- Good water solubility ✓*
- Elimination of unpleasant odours ✓*
- Dye transfer inhibition ✓*

We live know-how.

WEYLCHEM

Peractive® TAED

The cost-effective all-round bleach activator

ADVANTAGES

The "TAED system" (Peractive® TAED plus hydrogen peroxide releasing bleaching agents) generates bleach active and antimicrobial acting peroxyacetic acid (PAA). In the temperature range of 30 to 60 °C highly reactive PAA removes the whole range of colored stains from fabrics and provides a high hygiene standard of the wash.

Peractive® TAED is produced in an atomic efficient, solvent-free process with water as only by-product. TAED is safe for consumers and environment, has a low tox/ecotox profile and is readily biodegradable.

FEATURES OF THE BLEACH ACTIVE INGREDIENT

PAA generated from Peractive® TAED is a multifunctional ingredient and fulfills a number of tasks in the washing process:

- Oxidative removal of a broad number of coloured stains
- Especially effective on fruit and beverage stains
- Dye transfer inhibition
- Colour and fabric safe
- Biocidal action on a broad range of germs
- Prevention of biofilm formation
- Odour improvement

Application areas

Peractive® TAED is available as free-flowing powder. In addition, a broad range of tailor-made, storage stable granules guarantee best performance in various applications: laundry and dishwashing detergents, bleach boosters, denture cleansers, I&I applications, pulp&paper bleach and textile industry.

TECHNICAL PROFILE

- Ratio persalt: TAED > 2:1 (molar basis)
- Optimum temperature range 30 to 60 °C
- Optimum pH: 9 to 11
- Usage concentrations:
 - Laundry powders: 1-5 %
 - Laundry tablets: 3-7 %
 - Dishwashing tablets: 2-4 %
- Compatible with all other detergent ingredients

For details please refer to data sheets for Peractive® TAED powder and granules.
