NAXONAC® 8104

Product Data Sheet

C6-12 Alkyl alcohol ethoxylate phosphoric acid

Description:

Catexel Nease LLC offers a growing list of phosphate esters under the NAXONAC® trade name. As an anionic surfactant, one of the main advantages of phosphate esters is their stability and solubility in alkali systems. They can be used as hydrotropes to couple nonionic surfactants systems which are not soluble and at the same time increase wetting and detergency properties. The presence of the phosphate group imparts some interactions with metallic surfaces, thereby exhibiting some anti-corrosion and metal-adhesion characteristics. They can be used as additives in oil and water-soluble lubricant systems to improve lubricity, anti-frictional properties of the formula. Phosphate esters also find use as emulsifiers in emulsion polymerization.

CAS #

68921-24-4

NAXONAC® 8104 is a complex mixture of monoester and diester of alkyl alcohol ethoxylate phosphoric acid with proven hydrotropic ability in liquid formulations. It is effective as a surfactant in heavy duty alkaline liquid formulations.

NAXONAC® 8104 is soluble in high electrolyte systems. It is very useful as solubilizer and corrosion inhibitor in various sanitary and industrial cleaning formulations.

Typical Properties:

| | |
|-------------------------|------------------------|
| Appearance | Clear to yellow liquid |
| Specific Gravity @ 20°C | 1.03 |
| Flash Point, (open cup) | > 201 °F |
| Solubility in Water | Soluble |

Product

Specifications:

| Property | Specification |
|-------------------------------------|------------------------|
| Appearance | Clear to yellow liquid |
| Water Content, wt. % | 1.5 Max |
| Acid number (1 st infl.) | 115.0-135.0 |
| pH (10% solution) | 1.0-3.0 |
| Color (Gardner) | 1.0 Max |

Applications:

Household and industrial detergents, corrosion inhibitor, heavy duty alkaline detergent, sanitary and industrial cleaners, pulp and textile chemicals

Storage and

Handling:

Store covered in a dry, well ventilated area. Keep container tightly closed when not in use. Prevent from freezing. Store material above 20°C (68°F).

Availability:

55 gallon drum, 275 gallon tote

Chemical Control

Law Status:

This product is in compliance with the inventory listing requirements of the Chemical Control Laws in the following countries: United States of America, Canada (NDSL), Europe, Korea, and Japan

Transport Regulations

| | | | | |
|-----------------------|-------------------|-------------------|-------------|--|
| Shipping Description: | DOT Non-Regulated | | | |
| Hazard Class: NA | ID Number: NA | Packing Group: NA | Label: None | |
