NAXONAC® 965A

Product Data Sheet

Nonylphenoxy poly(ethyleneoxy) ethyl ester of phosphoric acid, ammonium salt

Description: Catexel Nease LLC offers a growing list of phosphate esters and their salts under the NAXONAC® trade name. As an anionic surfactant, one of the main advantages of phosphate esters is their stability and solubility in alkali systems. They can be used as hydrotropes to couple nonionic surfactants systems which are not soluble and at the same time increase wetting and detergency properties. The presence of the phosphate group imparts some interactions with metallic surfaces, thereby exhibiting some anti-corrosion and metal-adhesion characteristics. They can be used as additives in oil and water-soluble lubricant systems to improve lubricity, anti-frictional properties of the formula. Phosphate esters also find use as emulsifiers in emulsion polymerization.

CAS #
68511-21-7

NAXONAC® 965A is an ammonium salts of phosphate ester, NAXONAC® 965. This surfactant is useful in emulsion polymerization of broad range of emulsion polymers including acrylics, vinyl-acrylics and styrene-acrylics.

Typical Properties:	Appearance	Clear to yellow liquid
	Specific Gravity @ 25°C	1.01
	Flash Point, (open cup)	Non combustible
	Boiling Point	100°C, Water
	Solubility in Water	Dilutable

Product Specifications:	Property	Specification
	Appearance	Clear to yellow liquid
	pH, As is	7.0-8.5
	Color (Gardner)	1 Maximum

Applications: Emulsion polymers

Storage and Handling: Store covered in a dry, well ventilated area. Keep container tightly closed when not in use. Prevent from freezing. .
Store material above 20°C (68°F).

Availability: 55 gallon drum, 275 gallon tote

Chemical Control Law Status: This product is in compliance with the inventory listing requirements of the Chemical Control Laws in the following countries: United States of America, Canada (NDSL), Europe, Korea, and Japan

Transport Regulations
Shipping Description: DOT Non-Regulated
Hazard Class: NA ID Number: NA Packing Group: NA Label: None
